Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-22,24,25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 30,15,16,22,24 of U.S. Patent No. 6610091. Although the conflicting claims are not identical, they are not patentably distinct from each other because a prosthesis system to replace a natural facet joint between first and second vertebral bodies comprising caudal prosthesis and cephalad prosthesis configured and adapted for mutual articulation after replacing the natural facet joint is fully set forth in the claims of the parent patent 6610091.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant has amended the claims to define with definiteness a facet system. The claims as now amended does not appear to claim any new structures or elements not previously set forth in the claims of the parent patent. The language of the claims as amended is essentially identical to the language of the claims of the parent patent and therefor applicant's amendment necessitated a new ground of rejection.
